

Irvin Stein, M.D.

Gerald Finerman, M.D.

History of The Stein-Finerman Lecture

Dr. Irvin Stein, who completed a portion of his Orthopaedic Residency training at Johns Hopkins (1932-34), wished to endow a lectureship at Johns Hopkins for Orthopaedic Surgery. He had very fond memories of the Department of Orthopaedic Surgery at Johns Hopkins, because of both his affiliation and that of his former son-in-law, Dr. Gerald Finerman. Dr. Finerman was also a resident in the Johns Hopkins Orthopaedic Surgery program from 1966-69.

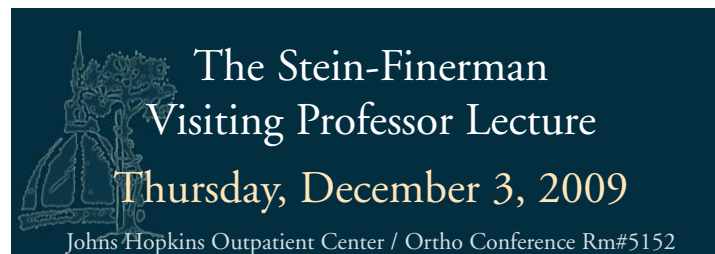

At the time of Dr. Stein's death, at age 93, his daughters donated funds from his estate to endow a lectureship in his name.

Dr. Stein practiced in Philadelphia and was Professor of Orthopaedic Surgery at the University of Pennsylvania. He endowed a lectureship there, as well. He was very interested in metabolic bone disease especially osteoporosis and Paget's disease, and co-authored a book entitled **Living Bone**; a review of clinical aspects of metabolic bone disease.

“The Natural History of Rotator Cuff Tears: Implications for Treatment”

Ken Yamaguchi, M.D.

Sam & Marilyn Fox Distinguished Professor of
Orthopaedic Surgery
Chief, Shoulder and Elbow Service
Washington University School of Medicine

Ken Yamaguchi, M.D.

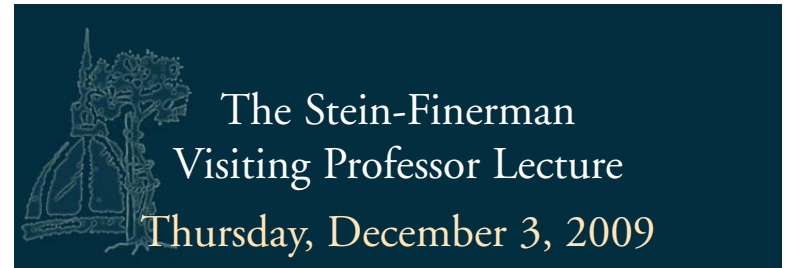

Sam & Marilyn Fox Distinguished Professor of
Orthopaedic Surgery
Chief, Shoulder and Elbow Service
Washington University School of Medicine

Dr. Yamaguchi is the Sam and Marilyn Fox Distinguished Professor of Orthopaedic Surgery and Chief of the Shoulder and Elbow Service at Washington University School of Medicine in St. Louis, MO. He received his medical degree and completed a residency in orthopaedic surgery at George Washington University. Dr. Yamaguchi then completed the internationally recognized Neer Fellowship in Shoulder and Elbow Surgery at Columbia Presbyterian Medical Center, followed by supplemental training in elbow surgery at the Mayo Clinic.

Dr. Yamaguchi founded the Shoulder and Elbow Service at Washington University School of Medicine in 1995. It has since grown into one of the most clinically active and research productive services for shoulder and elbow surgery in the country. Additionally, Dr Yamaguchi is currently a Deputy Editor of Upper Extremity for the Journal of Bone and Joint Surgery. He also serves or has served on several AAOS committees including, as Chair of the AAOS Rotator Cuff Treatment Guidelines committee, Council for Research, and Board of Directors.

Dr. Yamaguchi's practice is dedicated to shoulder and elbow surgery with his clinical interests including both degenerative and sports disorders of the shoulder and elbow. In addition to arthroplasty techniques, he is primarily interested in arthroscopic or minimally invasive surgery. His research interests are focused primarily to the rotator cuff as well as development of shoulder and elbow arthroscopic procedures.

He is the co-author of over 100 publications. As a recipient of both the OREF Career Development Award and one of a few clinical NIH R01 grants, he is investigating both the natural history of rotator cuff disease and clinical factors important in rotator cuff healing.

Program

- | | |
|----------------|---|
| 6:30 am | Breakfast |
| 7:00 am | Welcome & Introduction of
The Stein-Finerman Lecture
<i>Frank J. Frassica, M.D.</i> |
| 7:10 am | Introduction of Visiting Professor
<i>Paul D. Sponseller, M.D.</i>
<i>Edward G. McFarland, M.D.</i> |
| 7:15 am | Stein-Finerman Lecture

“The Natural History of Rotator
Cuff Tears: Implications for
Treatment”
<i>Ken Yamaguchi, M.D.</i> |
| 8:15 am | Resident Teaching Sessions
<i>Ken Yamaguchi, M.D.</i> |
